# Mariana Budani

FULLSTACK DEVELOPER

## Professional Profile

Full Stack Developer with over 8 years of experience, mainly focused on web development using a wide range of backend and frontend technologies. I have contributed to software development solutions, participated in process improvement planning, system migrations, and the integration of new tools and technologies.

I have strong experience implementing standards, policies, and procedures for new technologies, as well as developing responsive, progressive web applications (PWA), and hybrid applications. I also specialize in microservices-oriented architectures, with a strong focus on high availability and scalability, leveraging Kubernetes-based environments such as OpenShift and OKD.

## Technical Skills

- **Languages:** PHP, Java, JavaScript, Node.js
- **Frameworks & Libraries:** React, Next.js, Laravel, CodeIgniter, Spring, Express
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Git, Docker, Linux, Windows
- **Methodologies & Practices:** Scrum, Kanban, CI/CD, integración automatizada, testing
- **Additional Skills:** Bootstrap, PowerBI, APIs REST, IA aplicada
